INTRODUCTION

Star Trace offers a range of products which are widely used across various laboratories and also hold diverse industrial applications.

These wide range of products are manufactured according to industrial quality and standards.

Backed by our excellent engineering and quality control team, we are able to satisfy the client requirement for various engineering products all over the world.

With more than 20 years of experience in this field, we have been supplying technically accurate and superior products to our clients and have catered to the requirement of variety of sectors and clients.

MODEL: STBM-0.5 TO STBM - 50

Working Principle

Ball Mill consists of cylindrical shell rotating on a horizontal axis mounted on a sturdy mild steel frame.

The Ball Mill Shell is designed to withstand the rotational load of the mill charged with the grinding medium and the material to be processed.

Openings are provided through which the grinding medium and the material to be processed are loaded and discharged.

The mill is driven by motor coupled to the reduction gear box with chain and sprocket arrangement.

Mill Linings	Ball and Pebble Mills may be lined with rubber, ceramic and wear resistant metallic liners.
Grinding Media	Mills may be charged with ceramic, steel and alloy steel grinding media. These are spherical or cylindrical in shape and range from 6 mm to 100 mm in size.
Capacity	0.5 to 50 Kg (Customer Choice)
Standard Sizes	12 x 12 inch, 8 x 9.75 inch
