INTRODUCTION

Star Trace offers a range of products which are widely used across various laboratories and also hold diverse industrial applications. These wide range of products are manufactured according to industrial quality and standards.

Backed by our excellent engineering and quality control team, we are able to satisfy the client requirement for various engineering products all over the world.

With more than 20 years of experience in this field, we have been supplying technically accurate and superior products to our clients and have catered to the requirement of variety of sectors and clients.

LAB ROLL CRUSHER

Roll Crusher Description:

The Roll Crusher has widely application in the industries of mining, building materials, chemical industry, metallurgy, Coal and Coke industries etc. The Roll Crusher can crush materials with middle hardness or less than middle hardness into secondary or fine granularity, such as crushing geological ores, mineral, rocks, coke, coal, slag, scoria and fire-proof material etc.

Rock Roll Crusher Working Principle:

The fixed part of roller and movable roller are driven by the motor via reducer and v-belt, the raw materials fall into the part between the two rollers from inlet of the machine. The two rollers rotates inward simultaneously. The materials are extruded, crushed and ground, then the end products come out from the bottom of this crusher.

Roll crusher Features:

Double roller crusher adopts V-belt or universal joint couplings for transmission and adjusting the gap between two rollers.
